

The Cove120

**Designed for More Space,
More Light, More Style**

Three factory-built 40' containers form the structural core. Once onsite, we construct the expansive center roofline and front exterior wall, creating an architectural openness and natural light that can't be achieved in a fully prebuilt unit.

Built for Tomorrow, Delivered NOW

Smart From the Start

Automations, sensors, and secure controls built directly into the home.

Healthier Living

Clean, conditioned air. Mold-resistant materials. A home designed to breathe.

Sustainable by Design

High-efficiency systems and off-grid capability reduce both cost and footprint.

Inside the Cove120

**Every detail has purpose.
Premium finishes, modern fixtures, and a
minimalist flow create a space that feels
open, calm, and effortless.**

Inside the Cove120

Primary bath and Guest bath.

Built for everyday living. Intentional layouts, durable materials, and modern touches create a space that moves easily and feels right from the start.

“what if the most affordable housing also had the least impact on the planet?”

- adapted from Tom Chi (At One Ventures) quote

what if it also had no monthly electric bill?

what if it was also the lowest in maintenance costs?

what if it was also a smart house?

what if it was also storm resilient?

At ContainerSolutions, we believe the future of housing should be all the above.

Take the Next Step

A complete home. Reimagined for the way people actually live.

- Fully finished on arrival
- Off-grid capable
- Fast to deliver
- Easy to own
- Beautiful to live in
